

An ISO 9001 : 2015 CERTIFIED COMPANY

1. Automotive Washer

Leading Manufacturer and Supplier of Automotive Washer such as Rubber Washer and PU Washer from Howrah.

Rubber Washer

We hold expertise in our domain for offering a finest quality range of Rubber Washers. Our entire range is prepared as per the defined industry standards using optimum quality rubber and sophisticated technology. Widely used for sealing the leakage in engines and motors, our Rubber Washer is perfect in their work. This range is easily available with us at everyday price range.

Features:

- Reliability with excellent performance
- Longer service life
- High strength

PU Washer

We are one of the leading companies of the market; we are engaged in offering a wide range of PU Washer. Offered range is manufactured under the strict supervision of our experts keeping entire quality standards of market in mind. Available in various size and specifications, this PU Washer is highly acclaimed amongst our clients. Safe packaging and timely delivery make it highly demandable.

Features:

- High strength
- Minimal maintenance
- Precision-designed

2. Rubber Diaphragm

Our range of rubber diaphragms is manufactured using high grade material procured from reliable vendors. These rubber diaphragms are known for its high efficiency and quality. These rubber diaphragms are offered with or without fabric reinforcement. Offering high performance and better results, these diaphragms are used in differential pressure gauges.

Rubber Diaphragm

We are offering an ample array of Rubber Diaphragm. Our offered range is fabricated by using the finest quality rubber and sophisticated technology of the market. The offered range is highly treasured by clients due to its sturdy design. Good and easy usability make this Rubber Diaphragm highly demandable.

Features:

- Robust design
- High tensile strength
- Resistant to extreme climatic condition

3. Mechanical Seal Ring

With the help of our efficient workforce, we are able to offer our clients Mechanical Seal Ring. All our products are procured from the authorized sources, who make these as per international quality norms, using high grade raw material and latest technology. Available at market leading prices, our castings are widely appreciated by the customers for their durability, corrosion resistance, dimensional accuracy, tear resistance and easy installation features.

Aluminum Seal Ring

Our clients can avail from us a comprehensive assortment of Aluminum Seal Ring. The offered ring is widely used in heat exchangers, vessels, reactors, car fans and other flange connections. Aluminum Seal Ring which is offered by us is fabricated by the use of high grade material and advanced technology. Highly appreciated range is available with us at everyday price range.

Features:

- Longer service life,
- Durable
- Premium efficiency

Rubber O Ring

We are one of the leading companies in the market, engaged in offering a vast range of Rubber O Ring. Our offered range is highly acclaimed in the market for its unmatched quality, longer service life and durability. Rubber O Ring is widely used among clients for eliminating leakage problems in engines in various workshops. Competitive price range makes our range highly demandable.

Features:

- The offered range is fabricated using optimum quality factor inputs
- Advanced technology used in order to meet the defined standards
- Clients can avail these in diverse thicknesses, shapes and sizes as per their varied requirements

Rubber Bucket Ring

We are engaged in offering a wide range of Rubber Bucket Ring. Our clients can easily avail this range from us that is manufactured with the use of finest grade rubber and high-tech machinery. These are used in various industries like automobiles, engineering, etc. for different purposes and applications. Rubber Bucket Ring is offered at reasonable price range.

Features:

- Reliable
- High performance and
- Durable

4. Automotive Roller

Providing you the best range of Automotive Roller such as Automotive Stainless Steel Roller and Automotive Rubber Roller with effective & timely delivery.

Automotive Stainless Steel Roller

We are offering a wide range of Automotive Stainless Steel Roller to our clients. Offered range is widely used in various paper industry machines. Designed as per latest market standard, this Automotive Stainless Steel Roller is also Hard Chrome Plated. Our range is available with us at good price range. Customization can also be avail from us as per the requirement of our clients.

Features:

- Maintenance free
- Optimally finished
- Enhanced durability

Automotive Rubber Roller

We are amongst the top leading companies of the market, we are offering a wide range of Automotive Rubber Roller. Offered range is fabricated with the use of high grade material which we procure from our reliable vendors. Automotive Rubber Roller is widely used in machines for various applications in paper and printing industries. Affordable price range makes this Automotive Rubber Roller highly demanded.

Features:

- Made from superior quality rubber
- More used for buffing or for smooth rolling
- Various sizes available

5. Rubber Oil Seal

We offer an extensive range of Rubber Oil Seals. These are manufactured using quality tested material. Our range of products is highly appreciated by our clients for its optimum quality and excellent performance.

Rubber Oil Seal

We bring forth for our valuable clients a comprehensive range of Rubber Oil Seal. This offered range is highly appreciated for its durability, longer service life and enhanced strength. Widely used in various industries such as automobiles, these help in preventing leakage in motor and engine. Rubber Oil Seal is known for its excellent performance.

Features:

- Capable of withstanding high temperature
- Rigorously tested on various parameters
- Available in different shapes and sizes

6. Cylinder Seal Kit

Manufacturer & Supplier of Cylinder Seal Kit. Our product range also comprises of Automotive Washer, Automotive Roller and Neoprene Rubber Sheet.

Cylinder Seal Kit

We are highly reckoned as one of the reliable companies of the market, we are presenting a qualitative range of Cylinder Seal Kit. Our offered range of product is highly acknowledged and acclaimed across the globe. Known for its durability and dimension accuracy, this Cylinder Seal Kit is highly appreciated amongst our clients. Affordable price range is set for our offered range.

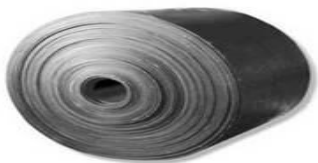

Features:

- High strength
- Dimensional accuracy
- Durability

7. Rubber Sheet

Our organization is involved in manufacturing, trading and supplying a wide range of Neoprene Rubber Sheet. The offered range is widely used in various industries such as engineering, automobiles, etc. Manufactured using premium quality raw material and advanced technology, these are designed in compliance with the international standards. These are highly appreciated among clients for their efficient performance, dimensional accuracy and enhanced durability. Further, our valuable clients can avail these products from us at the most affordable rates.

Rubber Sheet

We are highly reckoned as one of the most reliable companies of the market, engaged in offering a qualitative range of Neoprene, Nbr, Natural, Viton, Silicon, Epdm, Rubber Sheet. The offered range is designed with high precision in order to meet the international quality standards. These are widely used in automobile, construction and many other industries for various applications. Competitive price range makes this Neoprene, Nbr, Natural, Viton, Silicon, Epdm, Cork Rubber Sheet highly demandable.

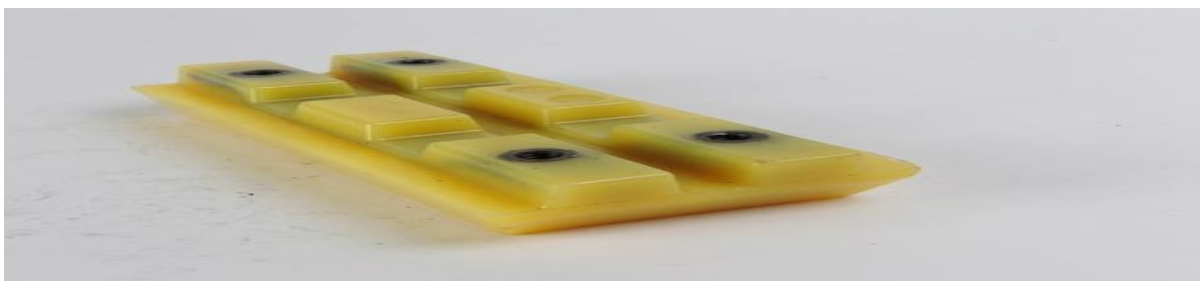

Features:

- Good quality material
- Unsurpassed performance
- High temperature resistance
- Leak proof nature

8. Polyurethane Track Pad

Manufacturer & Supplier of Polyurethane Track Pad. Our product range also comprises of Automotive Washer, Automotive Roller and Neoprene Rubber Sheet.

Polyurethane Track Pad

We are amongst the leading choice for Polyurethane Track Pad. These track pads are have high ability to resist or withstand abrasion, owing to the use of polyurethane. Further, these products have a longer life cycle and provide complete value for money in the long run.

Features:

- Cost effectiveness
- Highly durable
- Shock absorbance

8. Automotive Gasket

Our product range includes a wide range of Automotive Gasket such as Ring Type Joint Gasket, Rubber Gasket and Pipe Flanges Gasket.

Ring Type Joint Gasket.....

We are presenting a wide range of Ring Type Joint Gasket. Our range is fabricated with the use of high grade material which we procure from our trusted vendors. Ring Type Joint Gasket is widely used in many industries as sealant for machines, motors and engines. Bulk price make this range highly appreciable amongst all.

Features:

- Optimum strength
- Finely finished
- Corrosion resistance

Rubber Gasket.....

Fabricated with quality approved rubber, we are offering a wide range of Rubber Gasket. Offered in various sizes, this range is widely used in automobile and automotive industries. Rubber Gasket is highly demanded for its great design and high strength. We are offering Rubber Gasket at reasonable price range within good packaging facility.

Features:

- High efficiency
- Accurate dimension
- Flexible

Pipe Flanges Gasket

To serve the market with best product range, we are offering a wide range of Pipe Flanges Gasket. Our range is highly appreciated for its perfect and smooth finish. Sturdy construction make it high usable for various purposes. Pipe Flanges Gasket is available with us at reasonable price range.

Features:

- Highly durable
- Give optimum performance
- Expanded form

9. Neck Seal

Manufacturer & Supplier of Neck Seal. Our product range also comprises of Automotive Washer, Automotive Roller and Neoprene Rubber Sheet.

Neck Seal

With the assistance of our professionals, we are engaged in offering a broad array of Neck Seal. These seals are widely used to

provide protection from leakage from motor and engine from oil loss. Neck Seal is fabricated by the use of quality approved material with the use of latest and sophisticated technology of the market. We are providing this range at reasonable price range.

Features:

- Fabricated using high quality
- Durable
- Easy usage
- Effective performance
- Customized as per various requirements

10. Expansion Joints

We are manufacturer and supplier of expansion joints

Industrial Expansion Joints

We manufacture and supply a wide range of **Industrial Expansion Joints** which is flexible connector fabricated synthetic or natural elastomers and fabrics. In order to provide stress relief in piping systems due to thermal and mechanical vibration and / or movements, these connectors may be fabricated with metallic reinforcements. These rubber expansion joints have been used and specified for many years by pressure vessel designers, plant engineers, consulting engineers, mechanical contractors, and turn-key construction firm.

Double Arch Rubber Expansion Joints

Our **Double Arch Rubber Expansion Joints** are accurately manufactured with specific dimensional details. These are used where flexibility is required in pipe joints as these can withstand high pressure upto 10 kg/cm² and create vacuum area. These can compensate for pipe misalignment and prevent damage to pipe-work or ducting system. Our rubber joints relieve stress of equipment flanges and neutralize the axial, lateral and angular stress.

Metallic Expansion Joints

We provide our clients with a comprehensive assortment of **Metallic Expansion Joints**. These expansion joints are manufactured using high quality raw material procured from the reliable vendors of the market. Customization of these products are also available according to the specifications of our clients.

Rubber Expansion Joints

We specialize to offer **Rubber Expansion Joints**, which is having exclusive advantage in muffling or interrupting noise transmission in pipelines at machine or pumps, in addition to their functioning as elastic pipe connections. They effectively compensate movements in pipeline, at Engines, pumps, Turbines, Equipments, Machines, and Tanks, and can be utilized to compensate for mounting inaccuracy as sealing elements where pipe systems pass through the walls or as extension pieces on fittings. Moreover, we provide our range in various designs and the fabric structure such as shape and rubber quality, which meet the specific application.

Fabricated Assembly Expansion Joints

We are offering to our clients a wide range of **Fabricated Assembly Expansion Joint**. We make use of high grade raw material in the fabrication of these products. Our experts design these products to perfection. Customized products are also offered by us at leading market prices to the customers. These products are widely used to balance wheels and machine pulleys in balancing machines.

Fabric Expansion Joints

We are offering a superior range of **Fabric Expansion Joints** to our clients, which is fabricated using high quality raw material in compliance with industry standards. These expansion joints are flexible connectors fabricated for providing stress relief in the ducting systems as they absorb movement resulting due to thermal change specifically for low pressure applications. Our range acts as shock absorbers, vibration isolators and in some cases for making up for minor misalignment of equipment or adjoining ducting. It provides optimum solution, for the low pressure ducting systems handling gaseous media, which is likely to adversely react with majority of the metals.

Rubber Expansion Joint

Rubber expansion joint are used where requires flexibility in pipe joints & to having pressure upto 10 kg/cm² and vacume area. We are looking for queries from **all over India**.

11.Hose & Bellow

We are leading Supplier & Manufacturer for the Hose & Bellow which also includes Chrome Leather Bellow & PTFE Bellow .

Chrome Leather Bellow

These **Chrome Leather Bellow** are known for their impeccable quality and durability, which result from the use of premium grade raw material. We are looking for queries from **all over India**.

PTFE Bellow

These seals are extremely suitable for corrosive chemicals including concentrated acids and salts. All the seals raw materials come in contact with the pumped fluids. We are looking for queries from **all over India**.

Bus Duct Bellows

We offer a premium variety of **bus duct bellows** that is fabricated from natural & synthetic elastomer. The bus duct bellow that we manufacture and supply provides the stress relief in ducting system due to thermal, mechanical and after movement. We are looking for queries from **all over India**.

Pneumatic Bellow

Pneumatic Bellows for dust prevention, hot air flow, fluid & slurry flow, Mechanical seals, for hydraulic & pneumatic machines, CNC Machine made from Rubber, Rexine, Leather, PTFE & High Temp. Resistance glasswool fabric. We are looking for queries from **all over India.**

Flanged Rubber Bellow

We are the leading bellow manufacturer with **Flanged Rubber Bellow**. We are looking for queries from **all over India.**

Rubber Bellow

We offer an extensive range of rubber bellow that includes dust covers, expansion ducts, bellows screw covers for protection of precious and precision machine parts. We are looking for queries from **all over India.**

Stainless Steel Corrugated Flexible Hose

Stainless Steel Corrugated Flexible Hose are the most easy and reliable compensator for piping. A flexible and quick option for rigid piping in difficult locations. We are looking for queries from **all over India**.

Rubber Suction Hose

Our wide range of Rubber Suction Hose is made using quality material and are offered in various specifications to our clients. Further, we also customize our range as per the requirements of the clients.

Rubber Hose Pipes

We offer our clients with a comprehensive range of carbon free **Rubber Hoses**. These are manufactured by our vendors using quality material. The lining of the hoses are made of natural, synthetic or blended rubber that are non conductive and smooth. Reinforcement of these Rubber Hoses are made of natural, synthetic rubberized woven textile fabric and the cover is made from synthetic rubber compound which is high resistant to oil, heat and electricity. These are available with or without asbestos and these are extensively used in carrying power cables in glass works, electrical furnaces, servicing in iron & steel industries for protection from exposure of high temperature, current leakage, radiation from steel furnace, open flame and splashes of hot metal. **We are looking for queries from all over India.**

12. Cement Plants spare parts

We also provide seals for applications in cement plants as well as equipments used in the plants for various purposes.

13. Injection Moulding Machines

The applications of injection molding machines are vast and can range from light tonnage applications to very high tonnage applications. The high workload environment necessitates hydraulic seals that are robust and up to the task. We offer high performance sealing systems for a variety of injection molding machine applications, including:

- Main ram cylinders
- Clamping cylinders
- Injection cylinders
- Ejection cylinders
- Pullback cylinders
- Traverse cylinders.

14. Hydraulic Seals

Most of mechanical applications are being performed by using hydraulic cylinders. It is the sealing system, which takes the pressure, thus it becomes the very critical part of the cylinder. Good & perfect sealing system is the back bone of hydraulic application. Our design engineers have developed a unique system to overcome failure modes common to heavy-duty hydraulic cylinders. We have done it by combining advanced seal materials with the most progressive seal profiles. We have successfully developed many hydraulic seals equivalent to international manufacturers. Their performance has been very much appreciated by our customers.

We provide various seals for hydraulic application like piston seals, rod seals, dust seals, wipers, guide rings widely used by the industry.

We provide seals for hydraulic applications in following industries:-

- Steel Plants
- Cement Plants
- Aerospace
- Defence
- Marine Engineering
- Construction And Mining
- Oil & Natural Gas Exploration
- Others.

15. Steel Mills And Metal Processing

We offer high performance sealing systems for a diverse number of steel mill & metal processing applications, including:

- Hydraulic Automatic Gauge Control (HAGC) cylinders
- Automatic Width Control (AWC) cylinders
- Caster segment cylinders
- Work-roll bending cylinders
- Back-up roll balancing cylinders
- Roll-neck bearings

- Strand guide cylinders
- Hydraulic quick-change cylinders
- Coiler and looping cylinders
- Straightening withdrawal unit segment cylinders.

16.PU Friction Disc For Texturising Machines

We offers Polyurethane friction disc for texturising machines. Pu disc are available for all types of texturing machines like BARMAGG, RIETER SCRAGG, HIMSON, ALIDHRA etc. Our PU DISC offer a much higher amount of friction and therefore more twist. As synthetic fibers are normally harder than PU, there is no noticeable fiber abrasion. This results in improvements regarding tenacity and elongation of the textured yarn.

Difference between Polyurethane Rubber Soft disc and Ceramic and Plasma coated hard disc:-

- It offers much higher amount of friction therefore more twist.
- Softness of PU rubber leads to minimal fiber abrasion and therefore generation of fluff stuff,also known as snow,is prevented during processing.
- It has better texturing ability and imparts better characteristics like desired bulk,loft and stretch in the yarn.

Our PU friction disc has following special properties:-

- Very high wear resistance against high speed rotation due to grade of polyol and isocyanate.
- Addition of certain additives makes it more oil resistant,high temperature resistant and safe against electrostatic charge build up.
- 100% piece to piece dimensional accuracy allows texturisers to have accurate yarn angle while moving through the friction unit.
- Uniformity and perfection in surface finish of our disc ensure appropriate T2/T1 ratio from the start itself to throughout its entire service life.
- Varieties in hardness of PU material allows texturisers to select appropriate disc hardness for different yarn qualities and deniers.

17.Mobile Hydraulics

As a provider of hydraulic seals we understand the specific requirements of the HEMM industry There are a wide variety of applications that require nothing less than high performance. We can provide seal kits for various applications like EXCAVATORS, DOZERS, DUMPERS, BACK HOE LOADERS, LWHEEL LOADERS, CRANES, FORKLIFTS etc. Some applications for which we can provide seal kits are as under :-

- Crowd cylinders
- Bucket cylinders
- Steering cylinders
- Hoist cylinders
- Blade cylinders
- Stabilizer cylinders
- Boom cylinders
- Arm cylinders.

18.Pneumatic Seals

Pneumatic seals are a device that restricts the escape of air or the entrance of foreign materials in a pneumatic application such as a cylinder. Pneumatic Seals are designed for low operating pressure. Pneumatic Seals are vital in machinery. Pneumatic Seals may be used for rotary and reciprocating motion. Pneumatic cylinders typically demand higher operating speeds and lower friction pneumatic seals.

We provide various seals for pneumatic applications like cushion seal, rod seals, piston seals in polyurethane, fluropolymer and nitrile material. We also provide seal kits for various pneumatic applications.

We also serves various industries like:-

- Steel Plants
- Automation
- Textile Equipments
- Various Other Applications.

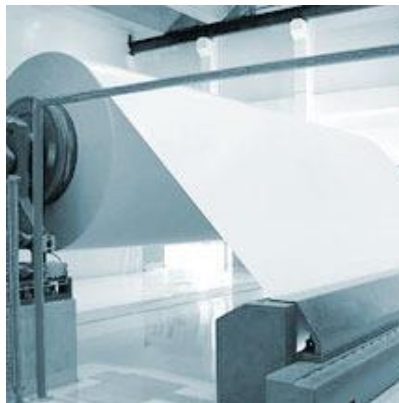

19. Heavy Duty Presses

The demanding world of heavy-duty presses relies heavily on the performance of its seals. We offer high performance sealing systems for a range of press applications, including:

- Bending, extrusion, and deep drawing presses in metal processing
- Forging presses and forging hammers in the scrap industry
- Scrap shears and presses for the building industry
- Ceramic and brick presses for wood processing
- Ceramic and brick presses for wood processing
- Bailing presses.

20. Pulp And Paper

The high-speed world of pulp & paper mills requires seals with the highest durability and performance. Long life & high speeds are just a few of the seal requirements. We offer high performance sealing systems for pulp & paper mill applications, including:

- Work rolls
- Bending compensation rolls
- Suction Rolls.

21. Seal Kits

Seal kits for various makes and models of Heavy Earthmoving, Mining, Construction and Material handling Equipments. Repair seal kits are available for following types of machines:-

- Excavators
- Back Hoe Loaders
- Dozers
- Wheel Loaders
- Dumpers
- Cranes
- Forklifts
- Other Material Handling Equipments.

22. Oil & Gas

We have a wide array of high-performance sealing systems for use in the oil and gas industry. Our seals are made of only the highest-strength materials. As a result, their dependability parallels their strength. Reduced maintenance costs and continued productivity of oil and gas processing are valuable results of the dynamic design features of our reliable sealing systems.

23. Hydraulic Products

We also specialize in hydraulic as well pneumatic products like Hydraulic cylinders, pneumatic cylinders, pump spares, valves, hoses etc. We offer following products :-

- Hydraulic cylinders
- Pneumatic cylinders
- Hydraulic pump parts
- Filters
- Other hydraulic and pneumatic products.

24. Hitech Polymer Parts

We can also provide you with other polymer spares like diaphragms, gaskets, bladders, bushes, extruded as well as moulded products made of polyurethane, nbr, hnbr, fpm, polyamide, polyoxymethylene, ptfe, filled ptfe etc.

25. Texturising Industries

Draw twisting and draw texturising are indispensable process for imparting twist, bulk and stretch in man-made yarns like polyester, polyamide etc. for ensuring consecutive processing into ready textile goods with high service characteristics. Draw texturising combines the economics of drawing and texturising steps. This has attracted many researchers which has led to development of not only the process but also machinery and its spares development. During texturising process the yarn is twisted by the friction disc which inserts necessary twist into the yarn, so that the yarn can get textured. Our offers pu friction disc made of polyurethane rubber which is specially developed for providing higher amount of friction and therefore more twist to the yarn during texturing process.

26. Rock Breaker Seal Kit

The best quality of rock breaker seal kit is offer by us to clients. This breaker kits are available for the breaker are furukawa, daemo, down, krupp, atlas copco, soosan, fine, NPK, indus, saga, okada, hm, jcb, power king etc.

Features:

- Durable
- Reliable
- Affordable

27. Center Joint Seal Kit

Unmatchable quality of Center Joint Seal Kit is offer to clients, which is extensively used in KOMATSU, HITACHI, POCLAIN, VOLVO, CATERPILLAR, SAMSUNG, HYUNDAI, KOBELCO, KATO, ZAXIS,. Further, the offer products are manufactured by using advance technology. These products are highly tested and appreciated amongst the customers due to their supreme quality.

Features:

- Qualitative performance
- High efficiency
- Durable standards

28.Track Adjuster Cylinder Seal Kit

Track Adjuster Cylinder Seal Kit is highly appreciated for their supreme quality and extensively used in the friction-producing areas. Further, the Track Adjuster Cylinders Seal Kit is offer by us in various sizes and specifications. One can avail these products in bulk due to its optimum quality.

Features:

- Durability
- Optimum performance
- Resistance against abrasion

29. Control Valve Seal Kit

Huge assortment of Control Valve Seal Kit is offer by us after testing the products for their quality assurance and high durability. Further, the offer Control Valve Seal Kit is extensively used in different suitable applications. The Control Valve Seal Kit is available in the market in different sizes.

Features:

- High strength
- Varied lengths
- Market leading prices

30. Hydraulic Main Pump Seal Kit

Matching to the huge requirements of the clients, we are involved in offering a wide array of Hydraulic Main Pump Seal Kit. This Hydraulic Main Pump Seal Kit is extensively used in KOMATSU, HITACHI, POCLAIN, VOLVO, CATERPILLAR, SAMSUNG, HYUNDAI, KOBELCO, KATO, ZAXIS. Customers can avail the products from us at reasonable rates in bulk.

Features:

- High efficiency
- Precision design
- Dimensional stability

31.Travel Pump Seal Kit

Highly durable and efficiently working Travel Pump Seal Kit is offer by us to customers. The offer Travel Pump Seal Kit is extensively used in excavators like BEML/KOMATSU /L&T/ CATERPILLAR/TATA HITACHI/HYUNDAI/KOBELCO/SAMSUNG/VOLVO. Moreover, the offer products are highly appreciated amongst the customers due to their supreme quality.

Features:

- Long Life
- Precise performance
- Cost effective

32.Swing Motor Seal Kit

Having the latest technology, we are involved in offering best quality of Swing Pump Seal Kit. This Swing Motor kit is extensively used in excavators like BEML/KOMATSU/L&T. CATERPILLAR/TATA HITACHI/HYUNDAI/KOBELCO/SAMSUNG/VOLVO. Moreover, the offer products are manufactured by using high grade material and designed as per the requirement in the market.

Features:

- Quality products
- Quality tested
- Easy to install

33.OTHER PRODUCTS

Automobile Rubber Mounting:

Rubber Grommet:

Backelite knobs:

Rubber Pads:

MANUFACTURING PRODUCTS DETAILS

<u>SL NO</u>	<u>NAME</u>	<u>MATERIALS USE</u>	<u>SIZE</u>
1.	O-RING	VITON,SILICON,NBR,SBR,EPDM,PU,PTFE,ETC.	10MM- 1000MM
2.	WASHER	DO	10MM-1000MM
3.	GASKET	DO	50MM-1000MM
4.	OIL SEAL	NBR,SBR,NEOPRIN,VITON ETC.	50MM-1000MM
5.	NECK SEAL	NBR,SBR,NEOPRIN,VITON ETC.	170MM-1000MM
6.	SHEET	VITON,SILICON,NBR,SBR,EPDM,PU,PTFE,ETC	1METER/10METER
7.	BELLOW	NATURAL,NBR,SBR,EPDM,PTFE,SS,MS,	NO LIMIT
8.	EXPENSION JOINT	NATURAL,NBR,SBR,EPDM, WITH FLANGE SS OR MS.	NO LIMIT
9.	FEBRIC BELLOW	NATURAL, EPDM,WITH CANVAS&FLANGE SS OR MS.	NO LIMIT
10.	PNEUMATIC BELLOW	NATURAL,NBR,SBR,EPDM, WITH FLANGE SS OR MS.	50MM-500 MM
11.	METALLIC JOINT	S.S. OR M.S.	NO LIMIT
12.	GROMMET	VITON,SILICON,NBR,SBR,EPDM,PU,PTFE,PLASTICETC.	25MM-1000MM
13.	STOPPER	VITON,SILICON,NBR,SBR,EPDM,PU,PTFE,PLASTICETC.	1INCH-10INCH
14.	MOUNTING	VITON,SILICON,NBR,SBR,EPDM,PU, WITH MS OR SS.	1 INCH-1METER
15.	SANDWITCH PAD	VITON,SILICON,NBR,SBR,EPDM,PU, WITH MS OR SS.	1 INCH-1METER
16.	HOSE PIPE	NATURAL,NEOPRIN,VITON,NBR,SBR,EPDM,PTFE,SS,MS,	NO LIMIT
17.	SOLID BUSH	NATURAL,NEOPRIN,VITON,NBR,SBR,EPDM,PTFE,	10MM-200MM
18.	BUCKET	NATURAL,NEOPRIN,VITON,NBR,SBR,EPDM,PU.	50MM-1000MM
19.	CANVAS BUCKET	ONLY CANVAS	50MM-1000MM
20.	ROD SEAL	ONLY PU.	START 50MM
21.	DUST SEAL	PU,NBR,VITON ,PTFE, ETC.	START 50MM
22.	PISTON SEAL	PU,NBR,VITON ,PTFE, ETC, CLASS 30,40 PEARLITIC GREY IRON , HSI2000 ETC.	START 50MM
23.	DKBI SEAL	PU WITH METAL	START 50MM
24.	GLAND SEAL	NBR,VITON ,ETC.	START 50MM
25.	V -SEAL	NBR,VITON ,ETC.	START 50MM
26.	U- SEAL	NBR,VITON ,ETC.	START 50MM
27.	WIPER SEAL	PU,NBR,VITON ,ETC.	START 50MM
28.	ALUMINIUM RING	ONLY ALUMINIUM	25MM-500MM
29.	DIAPHRAGM	VITON,SILICON,NBR,SBR,EPDM,ETC.	25MM-700MM
30.	PTFE COTED DIAPHRAGM	PTFE COTED WITH VITON,SILICON,NBR,SBR,EPDM,ETC	25MM-500MM
31.	ROLLER LINING	NBR,SBR,NEOPRIN,VITON,PU ETC.	NO LIMIT
32.	PNEUMATIC CYLINDER SEAL KIT		AS CYLINDER WISE
33.	EARTH MOVING SEAL KIT		PART NO. WISE
34.	BORE POWER CYLINDER SEAL KIT		AS CYLINDER WISE
35.	AIR BRAKE RUBBER		AS DRAWING
36.	SPACER RUBBER		AS SPECIFICATION
